Brother/Bishop Mark began with his "slide show" from the PDF he had sent to students earlier, but he soon decided not to show all the slides in class as he wanted to keep the dialogue open, and to be able to see everyone's faces. After going around the room and asking each person present to share about their own reactions to Christianity, He continued his talk while students could follow along with his handout (attached here again).

Br. Mark continues his exploration and explication of Christianity, including the a meditative class exercise as well as engaging in dialogue with students about his whole cosmology, in which he positions his faith, and Christianity, against the backdrop of Creation, all the way from before the big bang right up to the present moment. A fascinating world-view! Another discussion ensues right near the end about the origin and true meaning of "the Shadow" or "evil" in the world.
